OPTIONS* AND PACKS

FRONT AND REAR PARKING SENSORS

When space is tight, the guidance given by the Toyota parking aid system helps avoid accidental scrapes. Ultrasonic sensors in the rear bumper link to an in-car audible warning that automatically activates when reverse gear is engaged. The warning beeps become progressively more frequent the closer your vehicle gets to an obstacle. The system can also be switched off when you don't need it, such as when towing a trailer.

This option includes 4 front sensors and 2 rear sensors for all grades.

ESSENTIAL PROTECTION PACK

The Essential Protection Pack helps keep your Yaris in showroom condition. The rear bumper protection plate helps prevent scrapes and scratches when loading items into the boot. In addition, your Yaris will also be equipped with front and rear mudflaps, which are designed to protect your car from mud, spray and stone chips. The pack also comes with a boot liner, that helps protect your boot space against dirt and helps you to clean your boot more easily.

1. Rear bumper protection plate

2. Boot liner

3. Front and rear mudflaps

* Options should be ordered in conjunction with the vehicle.

The 24-month option will show a saving over two 12-month Toyota Extended Warranty policies and is available with the low-user option at 30,000 miles or 24 months whichever comes first.

The Toyota Extended Warranty can be renewed until the vehicle is 12 years old with less than 100,000 miles at point of sale, and if a part covered by the Toyota Extended Warranty suffers electrical or mechanical failure at any time during the term, Toyota is committed to fixing it. You don't pay for replacement parts or labour.

Figures are provided for comparability purposes; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real-life driving results. Fuel consumption and CO₂ produced varies significantly depending on a number of factors, including the accessories fitted (post-registration), driving style, conditions, speed and vehicle load. All models and grades are certified according to the World Harmonised Light Vehicle Test Procedure (WLTP), which replaces the New European Driving Cycle test procedure (NEDC). All CO₂ figures quoted are NEDC equivalent. This means the CO₂ figures are based on the new WLTP test procedure but calculated (using a standard European calculation method) to allow comparison with the NEDC test procedure and will be used to calculate vehicle tax on first registration. All mpg figures quoted are full WLTP figures. More information can be found by visiting: www.vehicle-certification-agency.gov.uk/fcb/wltp.asp.
